- Aided operations team on deployment process on production environment with use of ServiceNow tool by creating change requests and other ticketing process.
- Delivered insights with a range of reports and documentation associated with API which would help in strategic planning at client's end.

Project: DHA Portal (09/2019 – 01/2022)

- Developed and maintained a robust Web API using ASP.Net, .Net Frameworks, ASP.Net MVC, WCF, ensuring the users interact with medical advisories and allow them to share details on medical data.

- Collaborated with cross-functional teams to design and implement features that provide seamless interaction for ease of use.
- Managed the development of the project using agile methodology, track progress and deliverables of the project using agile management tool like Jira.
- Managed the deployment process across multiple environments using CI/CD tool like Jenkins.
- Aided operations team on deployment process on production environment with use of ServiceNow tool by creating change requests and other ticketing process.
- Delivered insights with a range of reports and documentation associated with API which would help in strategic planning at client's end.
- Well versed with using Fiddler web debugging tool to analyze logs and traffic on Web API calls.

Awards and Recognition

1. **Pat on the Back Award** – Received Pat on the Back Award for the year 2024, in exceling the work taken up and delivered.

2. **Organization:** Giridhara Software Services Pvt. Ltd.

Designation: Web Developer

Technologies : C#, ASP.Net, MVC, Entity Framework, Angular.
 IDE : Visual Studio 2017
 Database : SQL Server 2008.
 Platform : Windows 8.
 Team Size : 2

Project: Happy Travels

- Developed a scalable Web Application to crater user requirement and engagements of their customers.
- Managed application development lifecycle process from requirement gathering to implementation and testing.
- Applied agile methodologies and use of agile management tools to track progress and deliverables. Worked on stories and bug fixes during the development process.
- Collaborated with users for ensuring seamless functionality of the Web Application and understanding their queries and provided troubleshooting steps as required.

3. **Organization:** National Informatics Center.

Designation: Programmer

Technologies : C#, ASP.Net, ADO.Net, HTML, CSS
 IDE : Visual Studio 2010
 Database : SQL Server 2002
 Platform : Windows 7.
 Team Size : 2

Project: CMEGP

- Developed a scalable government Web Application to crater respective department-based requirements.
- Managed application development lifecycle process from requirement gathering to implementation and testing.
- Managed a range of reports using reporting technologies like RDLC associated with ASP.Net.
- Collaborated with end-users and real-time data users for ensuring seamless functionality of the Web Application.

- Arranged training sessions for the end-users on the usage of Web Application.
- Provided troubleshooting and support for the queries or issues raised Web Application.

Technical Abilities & Professional Skills:

Coding	C#, ASP.Net, .Net Frameworks, Entity Framework, MVC, ADO.Net,
Markup Languages	HTML, XML, HTML5 & CSS.
Scripting Languages	Java Script, Angular.
IDE	Visual Studio 2010, 2013, 2015. 2022, Visual Studio Code.
Database	MS SQL SERVER 2008R2, 2012, 2019.
Operating System	Windows Server 2008, 2012, 2019 and Windows 8, 10, 11.

Educational Qualification:

Education	Specialization	College	University	Year of Passing
M. Tech	Software Engineering	AMC Engineering College, Bangalore	VTU, Belgaum	2015
B. E	Computer Science	R L J I T, Bangalore	VTU, Belgaum	2013

Personal Details:

Date of Birth : 26 Feb 1991
 Sex : Male
 Nationality : Indian
 Languages known : English, Hindi, Kannada
 Native Language : Kannada
