OBJECTIVE

Having 6.10 Years of IT Professional working experience in analysis, object-oriented design, development and implementation of client/server and web based applications using the latest technologies

PROFESSIONAL SUMMARY

- Having **6.10** years of experience in developing web applications using **ASP.Net MVC,Entity Framework , LINQ, C#, JQuery, JSON, HTML, AJAX, AngularJS, Angular** and **SQL Server**.
- Experience applying the latest development approaches including **MVC, LINQ** and **Entity Framework** in the browser, event-driven applications using **JQuery, JavaScript, AJAX, JSON and XML**.
- Well versed with **Software Development Life Cycle** process which includes designing, developing, testing and implementation.
- Experienced in **writing JQuery and Ajax calls**
- Work experience in **Entity Framework** DB first approach
- Version control with **TFS**
- Proficient with **Visual Studio 2012/2013/2015/2017**
- Knowledge of **Agile methodology** and experience working in a fast-paced Scrum environment
- Responsible for checking cross browser compatibility and hence worked on different browsers like Firefox, Google Chrome and Internet Explorer.
- Good team player as well as an individual contributor with good communication and interpersonal skills.

Professional Experience

- Worked as Senior Software Engineer in **Tollplus India Pvt Ltd** from Nov 2022 to Feb 2023
- Worked as Senior Software Engineer in **Foray Software Pvt Ltd and TCS** from October 2020 to Oct 2022

- Worked as a Assist Product Engineer in **Freyr Software Solutions** from November 2019 to October 2020
- Worked as a .Net Developer in **IDC Technologies** from December 2018 to May 2019.
- Worked as a .Net Developer in **Launchship Technologies** from November 2015 to December 2018.

TECHNICAL SKILLS

Web Technologies	ASP.Net, ASP.Net MVC, WebAPI, Angular, HTML, JavaScript, JQuery, AJAX, JSON ,
JavaScript Framework's	AngularJs, jQuery
Debugging Tools	Google Chrome , Firefox , postman
Web Designing Tools	Visual Studio
Database	SQL Server 2012/2014
Computer Languages	C#, SQL, Entity Framework, LINQ
Operating Systems	Windows 10/8/7/XP/Vista/2000
Methodologies	Agile
Version Control	TFS

EDUCATION

MCA-2015

Nizam college Hyderabad,68%

PROFESSIONAL EXPERIENCE

PROJECT #1

Project Name : CEBA
Organization : Tollplus.
Team Size : 6
Application Type : Web Application
Environment : ASP.Net, AJAX, Java Script,Entity Frame Work, HTML5, Linq, C#.NET and SQL Server.

Description: It is used to a transport services at the toll plaza's and work as a mediator between customers and toll plazas transactions so working for several banks

Roles and Responsibilities:

- Understanding of business requirements.
- Involved in the coding and implementation.
- Developing Stored Procedures and Database Management.

- Prepared of Unit test Cases.

PROJECT #2

Project Name : PRISM
Organization : TCS.
Team Size : 15
Application Type : Web Application
Environment : MVC, Angular, AJAX, Java Script, JQuery, Entity Frame Work,

Bootstrap, HTML5, Linq, C#.NET and SQL Server.

Description: PRISM to implement Product Registration Process and Submissions Tracking Management (PRISM) software tool. Application with modules to enter, store and maintain RIMS data for Products, Registrations, Devices and Submissions.

Roles and Responsibilities:

- Understanding of business requirements
- Requirement Analysis and coordinating with Functional team to gather the requirements.
- Involved in the coding and implementation.
- Developing Stored Procedures and Database Management.
- Developing User Interface Screens
- Creating necessary data base stored procedures as per the requirements.
- Prepared of Unit test Cases.
- Supporting production operational issues to ensure stability and quality as per service level agreement.

PROJECT #3

Project Name : prodential
Organization : Freyr Software Solutions
Team Size : 15
Application Type : Web Application
Environment : MVC, AngularJs, AJAX, Java Script, JQuery, Entity Frame Work, Bootstrap, C#.NET, ADO.Net and SQL Server.
Database : SQL Server 2008

Description: This project is to provide continuous support to initial capital model application as Solvency II support team. Managing ticket query system and ensuring the actuaries jobs are completed without any issues

Roles and Responsibilities:

- Understanding of business requirements
- Implemented Models, Views and Controllers using ASP.NET MVC
- Designed and developed the Web user Interface using ASP.NET MVC5, C#, JavaScript, JQuery and Bootstrap
- Development, code review, unit testing and integration testing.

- Fully involved in module analysis, analyze specifications, user interaction, designing, coding of the application, performing unit testing and prepared the User training document.

PROJECT #4

Project Name : MARS

Client : TCS

Organization : IDC

Technologies

Team Size : 5

Application Type : Web Application

Environment : MVC, TFS, AJAX, Java

Script, JQuery,

Bootstrap, HTML5, Linq,

C#.NET, ADO.Net and

SQL Server.

Database : SQL Server 2008

Description: Mars is a global organization which handles different applications like PETCARE,GUMS and MINTS,FOOD etc. We have handled main ecommerce sites.

Roles and Responsibilities:

- Understanding of business requirements
- Implemented Models, Views and Controllers using ASP.NET MVC
- Designed and developed the Web user Interface using ASP.NET MVC5, C#, JavaScript, JQuery and Bootstrap
- Development, code review, unit testing and integration testing.
- Fully involved in module analysis, analyze specifications, user interaction, designing, coding of the application, performing unit testing and prepared the User training document.
- Prepared of Unit test Cases.

PROJECT #5

Project Name : Smart Track (Vendor Management System)

Client : Dcr WorkForce (USA)

Organization : Launchship Technologies

Team Size : 10

Application Type : Web Application

Environment : MVC, TFS, AJAX, Java Script, JQuery, Bootstrap, HTML5, Linq, C#.NET, ADO.Net and SQL Server.

Description:

A Vendor Management System (VMS) is basically a software tool used by business to manage companies that supply labor to them. However that doesn't even begin to do this valuable system justice. A VMS is that "thing" you didn't know you really need... just like other software programs you perhaps were oblivious to but now you just can't live without it. Simply put: Instituting a VMS, namely Smart Track, DCR's Vendor Management System (VMS), will significantly reduce labor costs by helping to eliminate rogue spending and scope creep as well as save you considerable amounts of both time and effort by giving you access to the best talent pool and significantly streamlining your work processes. And best of

all, you can instantly access this on-the-go with our mobile app. So really, a better definition of a Vendor Management System is a sophisticated software program that provides precise monitoring, consolidated billing and detailed reporting as well as comprehensive analysis and visibility into all operations with labor suppliers (aka vendors). Most importantly, these capabilities significantly outperform manual processes and individual software systems by condensing the data into one sleek dashboard.

Roles and Responsibilities:

- Understanding of business requirements
- Implemented Models, Views and Controllers using ASP.NET MVC
- Designed and developed the Web user Interface using ASP.NET MVC5, C#, JavaScript, JQuery and Bootstrap
- Development, code review, unit testing and integration testing.
- Provided the Application training for the Product documentation team, Support team and maintenance teams.
- Fully involved in module analysis, analyze specifications, user interaction, designing, coding of the application, performing unit testing and prepared the User training document.
- Handling the onsite calls effectively.
- Prepared of Unit test Cases.

Achievements

1. implemented **Globalization Language** and **Localization Time Zone** and **Redis Cache** across Smart Track.

PROJECT #6

Project Name : SmartTrack xCHANGE
Client : Dcr WorkForce (USA)
Organization : Launchship Technologies
Team Size : 8
Application Type : Web Application
Environment : MVC, TFS, AJAX, Java Script, JQuery, HTML5, CSS3, LINQ, C#.NET, ADO.Net and SQL Server.
Database : SQL Server 2008

Description:

Smart Track xCHANGE is an interactive community dedicated to matching top talent with top staffing professionals to fill the needs of our clients. It's not just another candidate pool or supplier database; it's an ecosystem in which everyone from the contingent worker to the client plays a role. The community that evolves allows clients to fill empty positions more quickly and to better retain valued non-employees for extended or future contracts. xCHANGE offers clients the next generation in social sourcing.

Roles and Responsibilities:

- Understanding of business requirements
- Detailed design documents and Sequence diagram documents.
- Implemented Models, Views and Controllers using ASP.NET MVC
- Designed and developed the Web user Interface using ASP.NET MVC5, C#, JavaScript, JQuery and Bootstrap

- Development, code review, unit testing and integration testing.
- Fixed all issues while Conducting Unit Testing.
- Provided the Application training for the Product documentation team, Support team and maintenance teams.
- Fully involved in module analysis, analyze specifications, user interaction, designing, coding of the application, performing unit testing and prepared the User training document.
- Handling the onsite calls effectively.
- Prepared of Unit test Cases.

PERSONAL DETAILS

Name : P.Aneesh kumar.
Gender : Male.
Date of birth : May 09, 1992.
Marital status : Single.
Nationality : Indian

Address : Vidhyanagar, Kalyandurgam
Anantapur District

Place: Hyderabad

Regards,

Date:

(P.Aneesh)
