PROFESSIONAL EXPERIENCE:

Company:	**US Technology International Private Limited.**	**Dec 2020 – Till Date**
Profile:	Senior Software Engineer	
Technology:	.Net, C#, .Net Core Web API, Micro Services, Git, BDD, Unit test XUnit, Dynatrace, CICD pipeline, Angular17, JIRA.	
Work Location:	**Dell Technologies, Bangalore, Karnataka.**	

Projects Details:

Working as a senior developer to enhance the commerce platform of Dell, the main project is DCQO which is developed with microservices like cart service, Quote service, item service, sales order service, pricing service and open basket gateway, all are interconnected through a secure RESTful API.

Open Basket Gateway is one of them in which I am working, which is work like a bridge between Cart/Quote to Sales order to transfer the data.it depends on many interdependent downstream services.

GII Quote Gateway Offline Sales and Order Management applications are used in the Americas, EMEA and APJ regions by Sales Representatives to capture Customer information and create Quotes & Orders.

Responsibilities:

- With Agile Management, develop the stories with the ad hoc requirements on Asp.NET core platform, test on writing BDD test cases and deploy in CICD using GitLabs , Enable the Blue Green deployment strategies .
- Interacting with Product owners and stakeholders for assignment/tickets.
- Requirements are documented on JIRA and Confluence. Understanding the requirements and developed API codes using .Net core web API's and c#, involved solving application bugs.
- Writing Unit test cases using XUnit.
- Develop the Integration test cases using BDD Framework which helps to understand the business requirements in clean way.
